Perkins. 1641.

A
Prognostication for the
yeere of our Lord God,
1641.

Being the first after Bisextile or
Leap-year, and from the Worlds
Creation, 5604.

Wherein is contained the description of
the foure quarters of the yeere: As also a
Chronologicall Table of many things worth
remembrance, since the Creation, untill this
present yeere 1641. collected for the most
part, out of Ecclesiasticall History, and other
good Authors, something augmented.

By SAMUEL PERKINS, Well-
willer to the Mathemaricks,

The seventeenth Edition.

Printed at London by I. Raworth for the Company
of Stationers, 1641.

Prognostication for the

Year of our Lord God

Beginning the first of the Month of

January, and ending the last of

December, in the Year of our Lord God

1600, the first of the Month of

January, and ending the last of

December, in the Year of our Lord God

1600, the first of the Month of

January, and ending the last of

December, in the Year of our Lord God

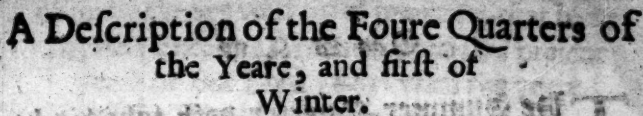

1600, the first of the Month of

January, and ending the last of

December, in the Year of our Lord God

1600, the first of the Month of

January, and ending the last of

ACCORDING to the custome of wytters in this kind. Winter Quarter is the first Quarter, which took beginning the 12 day of December, 1640. at which time the Sun entred into the first degree of the cold and dry signe Capricorne, being the most remote from us in his farthest South declination, causing the dayes with us to be shorrest, and the nights longest: Which Quarter continuing untill the Sun hath slowly passed through Capricorne, Aquarius, and Pisces. This Quarter doth naturally resemble Old age.

© in γ δ Π

This Quarter doth take beginning the 10 of March, at which time the Sun entrencheth into the first minute of Aries, and doth continue whilst the Sun is passing through these 3 vernal signs, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

The Summer Quarter doth take his beginning when the Sunne doth enter into the first degree of Cancer, which will be this yeare the 12 of June, and doth continue whilst the Sunne passeth through Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessity, his Physicke Axiom.

Of Autumne.

Autumne or Harbest Quarter (commonly called the Fall of the Lease, or some the Latter Spring) doth begin when the Sun doth enter into the first degree of Libra, making againe the day and the night of equall length: Which will be this yeare, the 13 of September, and doth continue whilst the Sun doth passe through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble declining age and Phlegmatick complexion.

A briefe Chronologicall Description
of many things worthy of memory, that have
happned since the Creation unto this present
yeere of our Lord 1641. with the yeere
of the World in which they happned,
in the first Columnne, faithfully
collected from many good Authors.

	Whitchurch	10	16		Ludlow	8	20
	Prie	14	12		Shrewsbury	20	
	Shrewsbury	12					

There is another way to go to Shrewsbury from Bristow, as
to Gloucester, Tewkesbury, Worcester and Bridenorth, &c.
but it is 17 miles farther, and then you passe no Ferry.

Cobham

Of the Eclipses this yeere 1641.

Of foure Eclipses, two of the Sunne, and
two of the Moone, we shall see but one,
and that of the Moone, on the eight of October
about eight in the evening, the Sun being in
Libra, and the Moone in Aries neere the Dia-
gons taile.

FINIS.
